Disclosures

Bluerock Total Income+ Real Estate Fund

Bluerock Total Income+ Real Estate Fund's primary investment objective is to generate current income while secondarily seeking long-term capital appreciation with low to moderate volatility and low correlation to the broader markets. Investing in the Bluerock Total Income+ Real Estate Fund involves risks, including the loss of principal. The Fund intends to make investments in multiple real estate securities that may subject the Fund to additional fees and expenses, including management and performance fees, which could negatively affect returns and could expose the Fund to additional risk, including lack of control, as further described in the prospectus. The Fund's distribution policy is to make quarterly distributions to shareholders. The level of quarterly distributions (including any return of capital) is not fixed and this distribution policy is subject to change. Shareholders should not assume that the source of a distribution from the Fund is net profit. A portion of the distributions consist of a return of capital based on the character of the distributions received from the underlying holdings, primarily Real Estate Investment Trusts. The final determination of the source and tax characteristics of all distributions will be made after the end of each year. Shareholders should note that return of capital will reduce the tax basis of their shares and potentially increase the taxable gain, if any, upon disposition of their shares. There is no assurance that the Company will continue to declare distributions or that they will continue at these rates. There can be no assurance that any investment will be effective in achieving the Fund's investment objectives, delivering positive returns or avoiding losses.

Limited liquidity is provided to shareholders only through the Fund's quarterly repurchase offers for no less than 5% of the Fund's shares outstanding at net asset value. There is no guarantee that shareholders will be able to sell all of the shares they desire in a quarterly repurchase offer. Quarterly repurchases by the Fund of its shares typically will be funded from available cash or sales of portfolio securities. The sale of securities to

fund repurchases could reduce the market price of those securities, which in turn would reduce the Fund's net asset value.

Investors should carefully consider the investment objectives, risks, charges and expenses of the Bluerock Total Income+ Real Estate Fund.
